EXPERIENCE

Choco Hypewear (Contract), Puerto Rico – Full-Stack Developer November 2024 - January 2025

- Developed an e-commerce platform using Python and Django, integrating secure Stripe API for seamless payment processing.
- Designed and implemented a robust inventory management system, enabling efficient product tracking, updates, and real-time stock monitoring.
- Collaborated with stakeholders to deliver a scalable solution, meeting client requirements and deadlines

Banco Popular, Puerto Rico — Bank Representative

April 2024 - Present

- Provided client support by handling account inquiries, processing transactions, and resolving issues while promoting relevant bank products to enhance customer satisfaction and business growth.

PROJECTS

- **Venmito Data Engineering project:**
 - Designed and developed a data engineering solution to process, clean, and analyze multi-format transaction and client data for Venmito
 - Built a RESTful API and interactive dashboard using Flask, Pandas, and SQLite to deliver financial insights, store performance metrics, and customer behavior analysis.
- **Ko-nnect project:**
 - Developed a full-stack employee management app.
